

## Sunbelt Consulting LLP

# Full Stack Software Engineer

● Technology ● Permanent / Full Time

**Experience: 3-5 years Vacancy: 2**

**Experience: 6+ years Vacancy: 1**

### Job Description

We are looking for Full Stack Software engineers to join our high performing and collaborative team to deliver software products that will be used across Australia and Latin America. Work on large scale client facing project with development teams and stakeholders located primarily in Australia.

The engineers we are looking for need to be able set up and initiate a fully functioning frontend application using the latest React JS framework along with other technologies such as webpack, Babel etc, and implement APIs as the backend to support an end-to-end user experience. Should be able to dive deep into complex existing systems to understand how things work and provide solutions for product problems we are trying to solve with analysis on trade-offs between different approaches.

### Sounds good? So, here are some technical skills you will need!

- You have experience working within robust and scalable platforms.
- You have significant experience with C#, .NET core and if you have hands on AWS this is a bonus.
- You have worked on web technologies such as ASP.NET MVC, Javascript and AngularJS/React.
- You have built applications with SOLID and micro services principles.
- You have experience building event-based systems using queue systems i.e. Rabbitmq.

- You have sound knowledge and experience on SQL, data storage, query optimization in SQL Server, Oracle or Postgres.
- You have experience in building server-side rendering frontend application and understand the differences and trade-offs between client-side rendering and server side rendering.
- You have comprehensive experience on CSS styling and building responsive frontend applications.
- It is also a bonus if you have experience in and understand how performance tracking basically works in frontend application.

### **And some of these soft skills are also important too!**

- You may have experience mentoring junior engineers
- You like to challenge the status quo and enjoy coming up with innovative ways to solve problems but you won't be afraid to fail!
- You think the big picture, but you're also a "do-er".
- You're a natural problem solver who believes in simple solutions (not easy solutions) and can accept consensus even when it's not your own opinion
- Collaboration is key, you will work on projects with many different tribes and won't be afraid to ask for help

### **Company Benefits**

- Permanent work from home opportunity.
- 20 Paid annual leaves, 10 Sick/Personal leaves, 10 Public Holidays as per Australian Calendar.
- We also have regular Hackathons, you can attend conferences (which is all happening virtually right now...), while we are working from home we still care about our employee's wellbeing and offer good work/life balance.
- Work timings from 7:00 am to 4:00 pm with weekends off.

### **Why apply?**

*When you work at Sunbelt you don't just have a job, but you have a rewarding career. We are an equal opportunity employer who prides themselves on providing a diverse workplace that brings out the best in its people. We encourage everyone of all ages and background to apply. We know how important keeping that balance between work/life is and have a range of flexible working options on offer. We are open to this conversation during our recruitment process so if you want to know more just ask!*
